

Horizon 2020

Title: **Serbian-Austrian-Italian (SAI) partnership**

Forcing Excellence in ecosystem research

Acronym: **SERBIA FOR EXCELL**

Grant number: **691998**

Coordinator **PhD Branislava Lalić**

Coordinator institution: **Faculty of Agriculture,
University of Novi Sad, Novi Sad, Serbia**

Call number: **H2020-TWINN-2015(CSA)**

Start date: **01.01.2016**

End date: **31.12.2018**

Become research AgMnet* member - if you are interested in becoming research group member you should first be employed on one of partner institutions (PFNS, BOKU or UNIFI). The next step is to contact SERBIA FOR EXCELL team trough web page and send us your research interest and work plan in the field covered by SERBIA FOR EXCELL.

Become public AgMnet* member - if you are interested in becoming public member of SERBIA FOR EXCELL you can register on project web page where you can find all materials about project together with all published research, educational and public texts and dissemination.

" think about environment, think green "

Serbia for Excell

Project Summary

The aim of the SERBIA FOR EXCELL is the upgrade of knowledge, skills and social capacity of PFNS in the field of environmental sciences, with special focus on agrometeorology and related ecosystem sciences (such as plant physiology, crop management).

The main tool for reaching that aim is establishment of the AgMnet⁺ research network at PFNS in collaboration with leading international research institutions BOKU and UNIFI. As a strategy to improve S&T capacities of PFNS, AgMnet⁺ is introducing the concepts of small study groups of PFNS, BOKU and UNIFI students and joint study teaching material in English and native languages. BOKU and UNIFI partners are implementing goal-driven measurement, modelling training and project writing in the selected research fields for AgMnet⁺ members.

The need for better cooperation is a driving force for researchers to upgrade the current state of scientific interaction and to establish a network of researchers from different research fields (AgMnet⁺), including students.

From that point we can reach general public and people in the specific field of work.

Focus Topics

AGROMETEOROLOGY

PLANT PHYSIOLOGY

CROP MANAGEMENT

SERBIA FOR EXCELL is addressing the fields of environmental and ecosystem research. These fields are becoming more important under the threat of future global climate change due to the emerging need for more efficient use of natural resources for sustainable food production and for promoting the welfare of societies in general.

Establishment of the information hub in environmental sciences, with focus on agriculture, ecosystem research and agrometeorology.
